Follow your dreams, embrace challenges, and believe in yourself. Science needs people like you!

“Join the adventure of science and help us discover new horizons!”

“Don’t let anyone ever tell you that you don’t belong. There is space for everyone in STEM careers!”

“Follow your passion, set your own path and reach for the stars.”

“There are many ways to be a scientist – find out what you love and don’t be afraid to be different!”

“Go for what you want to do. With passion and solid basic knowledge, anything is possible.”

“Hard work, determination and an open and flexible mindset will take you places.”

“Find yourself a good study group and mentors early on in your career and keep them close!”

“It’s a dream come true to support Webb, which will revolutionise the field of astronomy.”

“Be open to opportunities on your way – even if these may not be the ones you had in mind originally.”

“Space science presents interesting and exciting challenges every day.”

“I hope Webb will be a source of inspiration to future generations!”

“Raise your head, look at the sky and realise how small we are and how big our ambition is.”
